

Sahand fish farm

The Sahand system is an advanced prefabricated aquaculture system featuring composite fish tanks made by technoabzy.

The Sahand system can be installed on flat surfaces with minimal construction operations.

The internal surfaces of the tanks are highly polished and hygienic.

The tanks being in 8 parts, they are easy to manhandle and ship.

The main components of this system are:

- fibreglass tanks equipped with dual drain system
- water oxygenation part (oxygenator cone)
- ammonia removal part (disc filter)
- antiseptic part (U.V system)
- co2 removal part
- alarm control part
- command console
- emergency part (for emergency oxygenation and emergency power)
